

Note: For a fee, you can use Crossword Weaver to print a nice copy of this puzzle (one that doesn't look like a web page). You can check it out for free by downloading the demo from

- 1 Distance from the center of a circle to a point on the circle
- 3 Segment that connects two points of the circle
- 4 Arc that is exactly one-half of the circle
- 5 Circles that have the same size radii
- 6 Line that passes through exactly one point of the circle
- 8 Point where tangent touches the circle
- 9 Set of points in space that are a given distance from a given point
- 10 Segment that connects two points of the circle and passes through the center
- 12 Line that connects two points of the circle
- 13 Arc that is greater than one-half of the circle
- 15 Set of points on a plane that are a given distance from a given point

- 2 Continuous,unbroken part of a circle
- 7 Arc that is less than one-half of the circle
- 11 Angle where chords are sides and vertex is a point of the circle
- 14 Point in the middle of a circle
- 16 Circles that share the same center
- 17 Angle with radii as sides and vertex is the center
